## A new late white seedless table grape

It does not happen every day that a breeder finds a great new selection, but this one I will remember.

Back in 2004, when serving as **Sun World's** grape breeder, I made this cross, and on August 25, 2006, I have visited the original seedling and identified it as a new selection.

At first sight I knew that these grapes are special.

When I brought clusters into the lab everybody agreed that this new selection does have a lot of potential. This new selection fits very well to be harvested after Thompson Seedless as a late green seedless grape.

I am very glad that Sun World has continued the development of this selection

and has decided to brand it as: **AUTUMNCRISP®** 

This new selection became [US PP20,491 P2](#) on November 17, 2009.

Here are some links of articles about the new brand:
